Idempotent methods (GET,OPTIONS) don't change anything at the server (other than possibly adding log entries). Non-idempotent (PUT,POST,DELETE) methods change the data which is used to populate content in the web pages or effect change elsewhere (such as moving a crane, transferring funds, sending an email).

What is idempotency in HTTP methods? - Stack Overflow

Based on the theory of chain of injury occurrence, it can be concluded that in every accident, there is a chain of events which occurs in a logical and fixed order. There are a variety of factors which cause the occurrence of this chain and accidents. These factors may be grouped into two categories- unsafe conditions and unsafe acts.

Causes of Industrial Accidents: 18 Major Causes

We always make sure that writers follow all your instructions precisely. You can choose your academic level: high school, college/university, master's or PhD, and we will assign you a writer who can satisfactorily meet your professor's expectations.
