### STANDARD OPERATING PROCEDURES (SOP) TEMPLATE

In computing, the same-origin policy (sometimes abbreviated as SOP) is an important concept in the web application security model. Under the policy, a web browser permits scripts contained in a first web page to access data in a second web page, but only if both web pages have the same origin. An origin is defined as a combination of URI scheme, host name, and port number.

### Same-origin policy - Wikipedia

An SOP is a written set of detailed instructions to help workers successfully and safely perform a specific hazardous task (e.g. confined space entry, welding operations, using a circular saw). Also referred to as work instructions, SOPs are best for highly skilled jobs and when the equipment and work environment change often.

Once the document is opened, it may allow the attacker to take full control of the system from any location within the system. The issue lies in the loading of the shcore.dll and dcomp.dll files: these files are being searched for by the program in the same system-wide directory where the HTML file is executed.
